

## **Radio and Television (RAT):**

This Radio and Television specialism combines theory and practice-based learning to give students a thorough understanding of television, and radio, led by experienced teaching staff from the industry. The faculty has radio and television studios, which feature the latest broadcasting facilities and digital sound and video editing suites, helping students develop the practical skills in demand.

This pathway will deliver a range of practical broadcasting and journalistic skills, a grounding in media theory and history; a thorough understanding of how the Radio and Television media works; and what goes into creating great content. Students will graduate as a professional ready to work in broadcast media or within the wider field of Radio and Television.
